New Technologies in use at CDEEP

At CDEEP we always look for adaptation of new technologies. A few of them in use are given below.

- The CDEEP webpage is now equipped with key word search.
- CDEEP webpage is accessible on any smart device.
- The recorded CDEEP courses are accessed by users, both on campus and outside, from hired Cloud for all time availability of the courses to all the users.
- Give your feedback related to quality of streaming / contents etc. at help.cdeep@iitb.ac.in
- Another feature available to recorded CDEEP courses now is the transcription i.e. the speech to text conversion. Viewers now see the text of the voice they hear on the video display itself. This facilitates more clarity on the content being delivered and eliminates the differentiation due to pronunciation by different Course Instructors. It also helps in increasing the usage of our courses by its international reach.
- Our courses are also available with timeline for clearer visibility of the written text, slides and figures and facilitating faster browsing.
